

Reality captured. Possibility modeled.

Cinci360 delivers advanced 3D reality capture, digital twins, and architectural documentation for AEC firms, government agencies, insurance carriers, and facility managers nationwide. We transform physical environments into accurate digital assets that reduce field time, accelerate decisions, and improve coordination.

3D REALITY CAPTURE LiDAR, photogrammetry and hybrid workflows Interior and exterior as-builts Construction progress validation Scan-to-plan and scan-to-BIM Rapid-response site documentation	DIGITAL TWINS High-accuracy facility replicas Secure hosting and asset libraries IoT-ready environments Multi-property portfolio programs
ARCHITECTURAL DOCUMENTATION As-built CAD and construction documents Conflict detection and field verification Renovation and pre-design packages 3D walkthroughs and visualization	SUPPORTING TECHNOLOGY Small-business IT consulting Web presence and Google Maps strategy Cloud-based archival systems Digital workflow integration

SELECTED EXPERIENCE

ChangeUp Architecture - multi-site automotive documentation | BHDP Architecture - corporate projects | Kroger / 84.51 - commercial facilities | 80 Acres Farms - advanced manufacturing | Art Academy of Cincinnati - gallery documentation | DWELL513 - ongoing real-estate capture
